SUBJECT **Intelligence Expanded Chinat Map Program**

ACTION REQUIRED - REFERENCES **dated 11 October 1960**

25X1A6b

Discussion with Mr. Siebert, Army Chief of Engineers, affirms their desire to double the production of China Map Service for the next three years. He says that no funds are available to them to support an acceleration of the program this year or next. The maps that would be produced under an accelerated program would be useful to us. But the production of topographic maps is outside the function of this office, and we cannot therefore properly lend financial support to this proposal. It is our conclusion that if Army is interested in accelerating this program it should find the modest amount of money involved within its own allocation.
